Subject: MLPAComments: Plan S comment

I am writing to voice my strong opposition to the Blue Ribbon Task force Plan S which is going to be recommended by the task force for implementation. As a recreational angler I watched as the commercial fisherman were allowed to deplete central coast fish stocks while we were kept under ever tightening regulations and restrictions. It seems that recreational fishermans input is about to be ignored by the BRTF while the task force members are suggesting even more stringent restrictions . At the rate we are going our recreational fishing opportunities will be restricted to even less than the four months we now have (even less than that when you take weather into consideration).I would like to suggest that you consider CCRSG package 1 option B or CCRSG package 3 as REASONABLE alternatives to Plan S.

Thank you for taking the time to read this
respectfully
